		145	12.5
		165	15
		175	20
		190	25
		*205	*30

About the fees

Fees calculated on an hourly rate start when truck departs yard or otherwise to respond to an incident and ends when service has completed and truck has returned to base.

Hourly services are based on a one hour minimum. After the first hour, the rates are calculated in 30-minute increments. The 30-minute increments will be rounded up and prorated according to the hourly rate.

For fees related to vehicles and or equipment, the Base Rate includes specified equipment and one operator.

Storage

The storage Base Rate is based on a calendar day starting at the time of arrival of the vehicle, equipment, or load at the storage site. A partial day shall count as a full day.

An after-hours fee of \$75 is applicable to customers who require access to the Storage Site when it is not open for regular business.

Additional Fees

A 3% reimbursement charge for credit cards (applied to total)

A 15% Markup fee for any non-towing subcontracted services
